SUMMARY

Business and Data Analyst with 3+ years of experience driving business intelligence, requirements analysis, process optimization, and reporting automation across government, financial services, technology, and marketplace domains. Skilled in SQL, Python, Power BI, Tableau, Snowflake, and AWS, translating business needs into data-driven solutions that improve efficiency and support decision-making.

PROFESSIONAL EXPERIENCE

Analyst 1, California Secretary of State | Political Reform Division | USA

Apr 2026 - Present

- Developed and enhanced Oracle SQL-based compliance reporting solutions within an 80-table CAL-ACCESS environment, delivering dashboards and analytical reports supporting campaign finance oversight activities.
- Conducted large-scale SQL analysis of committee activity and filing records, identifying potentially inactive entities and delivering investigative datasets that streamlined compliance investigations and informed regulatory review decisions.
- Architected RPA process flows in Microsoft Visio and implemented Power Automate workflows, reducing report preparation time from 90 minutes to under 3 minutes weekly and saving 75+ analyst hours annually.
- Produced Power BI dashboards and analytical reports for internal stakeholders and public inquiries, improving access to regulatory information while consistently meeting service-level commitments.

Business Analyst, BNY | USA

Oct 2025 - Apr 2026

- Built SQL and Python data pipelines across PostgreSQL and Snowflake, processing 1.2M+ payroll records monthly, improving issue detection speed and reducing operational escalations by 10 hours weekly.
- Integrated LLM-based summarization models to analyze fraud investigation reports and unstructured case notes, enabling automated insight extraction and reducing manual review effort in investigation workflows.
- Implemented Alteryx and AWS Glue ETL pipelines, integrating employee, benefits, and tax datasets across four enterprise systems, improving data consistency and regulatory reporting accuracy.
- Developed Power BI and Tableau dashboards for real-time payroll and workforce analytics, reducing manual reporting effort and enabling faster operational and financial decision-making.
- Streamlined Agile requirements intake and backlog management for 35+ enhancements using Jira and Confluence, improving sprint execution efficiency and delivery coordination.
- Performed SQL-based workflow analysis and process optimization, identifying bottlenecks that reduced payroll reconciliation timelines by 2 business days and improved reporting accuracy.
- Facilitated cross-functional Agile delivery across HR, Finance, and IT teams, producing BRDs, FRDs, user stories, and UAT documentation for enterprise system enhancements.

Business - Data Analyst, Dell Technologies | India

Aug 2023 - Aug 2024

- Engineered automated SQL and Python data pipelines processing 3M+ financial transactions, transforming PostgreSQL datasets into Power BI reports that accelerated business performance analysis.
- Evaluated structured and unstructured financial data using Pandas and R, identifying anomalies that reduced reconciliation effort by 18 hours monthly and improved data reliability.
- Unified large-scale datasets across Snowflake and AWS S3 using Airflow orchestration, improving refresh frequency and enabling near real-time risk reporting capabilities.
- Delivered Tableau dashboards monitoring loan performance across five business segments, equipping stakeholders with actionable insights for portfolio and lending strategy decisions.
- Produced BRDs, FRDs, user stories, and process documentation through Jira and Confluence, streamlining stakeholder communication and supporting successful UAT outcomes.

Business Analyst, Airbnb | India

May 2021 - Jul 2023

- Leveraged SQL and Python to analyze host, guest, and booking datasets, uncovering demand trends that supported inventory planning and pricing optimization initiatives.
- Delivered Power BI dashboards monitoring marketplace health across 8+ regions, providing visibility into property performance, guest satisfaction, refund trends, and host quality metrics.
- Detected behavioral patterns through trust and safety analytics, enabling early identification of fraudulent listings and supporting platform risk mitigation initiatives.
- Drove workflow modernization efforts with Product, Operations, and Customer Experience teams, automating dispute-resolution processes and reducing average handling time by 18%.
- Conducted A/B testing and cohort analyses on search, pricing, and user-experience enhancements, translating findings into recommendations that improved marketplace performance metrics.

EDUCATION

University of Wisconsin-Madison - Master of Science, Business Analytics

Sep 2024 - May 2025

Keshav Memorial Institute of Technology - Bachelor of Technology, Computer Science Engineering

Aug 2019 - May 2023

SKILLS

Programming & Query Languages : SQL, Python, R

Business Analysis : Requirements Gathering, BRD, FRD, User Stories, UAT, Gap Analysis, Process Mapping, Workflow Analysis, Stakeholder Management, Root Cause Analysis

Data Analysis : Data Profiling, Data Validation, Statistical Analysis, A/B Testing, Cohort Analysis, Trend Analysis, KPI Reporting, Ad-hoc Analysis

Data Visualization & BI : Power BI, Tableau, Excel (Pivot Tables, Power Query, VLOOKUP), Dashboard Development, Executive Reporting, Data Storytelling

Databases & Data Warehousing : Oracle SQL, PostgreSQL, Snowflake, Data Modeling, Data Warehousing

ETL, Automation & Integration : Alteryx, AWS Glue, Apache Airflow, Power Automate, ETL Development, Data Integration, Data Transformation

Project Management & Collaboration : Agile, Scrum, SDLC, Jira, Confluence, Sprint Planning, Backlog Management, Defect Tracking

Cloud & Enterprise Platforms : AWS, AWS S3, Salesforce CRM, Microsoft Visio
